Lara A. Lembach, M.D. Alison M. Werne, M.D.

Sukhjit Basi, M.D. Lauren M. Weger, M.D. C. Adam Eyre, M.D.

ADHD Questionnaire

The following information must be delivered to the office for the Physician to review before the office consultation.

1. Notes from mother concerning the basic problem including:
 - a. *List the child's strong points.*
 - b. *List the child's problem points.*
 - c. *Who feels the child has a problem.*
 - d. *What has been tried to help the problem up to now.*
 - e. *What precipitated the call?*
2. Notes from father or any other caregiver answering all the above (should be filled out separately so notes cannot be compared and observations changed)
3. Notes from present teacher concerning child's behavior and learning ability
4. Notes from previous teachers concerning child's behavior and learning ability
5. Any end of year notes on report cards you have available for as many years as possible
6. Any and all evaluations such as SST's (student study team), IEP's (individual education plan)
7. Psychological evaluations either from school or from outside sources
8. Any evaluations from specialists
9. Any test results such as EEG, CAT or MRI scans if available
10. Any previous or present medications used and how each one worked
11. Other physician's notes-transfer of records

Please note: Psychological evaluations do not need items 3,4,5,6 unless the child's problems are definitely school related problems and part of the diagnosis.

If your insurance does not cover consultations of this type, you will be responsible for all charges.
